Cloud Engineer

Description
Company Overview:

Join our innovative team in Dubai, a hub of technology and digital transformation. We are seeking a highly skilled Senior IT Infrastructure Engineer to lead our IT initiatives.

Why Join Us?

- Work with cutting-edge technologies.
- Opportunities for career growth.
- Supportive and dynamic team.
- Competitive salary and benefits.
- Experience the vibrant lifestyle of Dubai.

Responsibilities
Key Responsibilities:

- **Virtualization & Migrations:** Manage VMware environments, perform migrations and upgrades.
- **Azure Expertise:** Oversee Azure Stack HCI, Azure public cloud services, and Azure Arc implementations.
- **Microsoft Technologies:** Manage Microsoft M365, Exchange Online, Entra, and patch management tools.
- **Open Source Virtualization:** Utilize Proxmox and other platforms.
- **Hyper-V Management:** Configure and maintain Hyper-V environments.
- **HCI & Storage Solutions:** Implement Dell VxRail HCI, and manage Dell, Pure, and EMC storage systems.
- **Monitoring & Patch Management:** Use PRTG for proactive monitoring and vulnerability patch management.
- **ITIL & ServiceNow:** Apply ITIL principles and use ServiceNow for IT service management.
