UI/UX Designer

Description
We are seeking a talented and passionate UI/UX Designer to join our team and help us create intuitive, user-friendly, and visually appealing digital products. In this role, you will be responsible for the entire design process, from user research and wireframing to prototyping, testing, and final implementation.

Responsibilities
User Research: Conduct thorough user research to understand user needs, behaviors, and pain points.
Information Architecture: Define the structure and flow of information within the product.
Wire-framing: Create low-fidelity wire-frames to outline the basic layout and functionality.
Prototyping: Develop interactive prototypes to test and refine the user experience.
Visual Design: Design visually appealing and user-friendly interfaces that adhere to brand guidelines.
Usability Testing: Conduct usability testing to identify and address any user experience issues.
Collaboration: Work closely with product managers, engineers, and other stakeholders throughout the design process.
Iteration: Continuously iterate on designs based on user feedback and testing results.
Stay Current: Keep up-to-date with the latest UI/UX trends and technologies.

Qualifications

- Bachelors in Computer Science, Information Security or relevant field
- 2-5 years relevant experience
